

Activity Experiment Data Description

These hypothetical data are for the activity experiment described in Section 26.6. The variables are as follows:

id	Subject identification number
activity	Activity condition (0=discussion; 1=exercise)
sex	0=male; 1=female
education	School completed: 1=no high school; 2=some high school; 3=high school diploma; 4=vocational/trade school; 5=some college; 6=associate degree; 7=bachelor's degree; 8=graduate school
health	Self-rating of health — "In general, would you say your health is..." 1=excellent; 2=very good; 3=good; 4=fair; 5=poor
BDI transform	Transformed Beck depression index score
ACTxED	Activity score multiplied by education value
ACTxHEALTH	Activity score multiplied by health rating
